

METADATA STATEMENT

Acknowledgement	These data were collected for the Commonwealth Environmental Water Office by a large number of organisations, institutions, jurisdictions and other stakeholders working collaboratively on the Long Term Intervention Monitoring Project. We acknowledge the First Nations peoples as the Traditional Owners and Custodians of the lands, waterways and skies of the Murray-Darling Basin. We thank them for their knowledge and science, and respect their continuing connection to culture and Country and the values reflected in these data.
Name of dataset or data source	Long-Term Intervention Monitoring (LTIM) Project data – Hydrology
Custodian of the dataset or data source	Shane Brooks (LTIM Data Manager)
Publisher/Agency	Commonwealth Environmental Water Office (CEWO), Department of Climate Change, Energy, the Environment and Water
Description	<p>The CEWO's LTIM Project examined the contribution of Commonwealth environmental water to the environmental objectives of the <i>Basin Plan 2012</i> (Basin Plan) and assisted the CEWO to demonstrate environmental outcomes and adaptively manage the water holdings. Monitoring and evaluation was focused in seven Selected Areas: the Junction of the Warrego and Darling rivers, Gwydir river system, Lachlan river system, Murrumbidgee river system, Edward/Kooley-Wakool river system, Goulburn River and Lower Murray River. These areas will continue to be monitored through the CEWO's Monitoring, Evaluation and Research (MER) Program.</p> <p>Data collected by monitoring at Selected Areas is used to evaluate local outcomes from watering and also contributed to the analysis and evaluation of Basin Plan objectives.</p> <p>The Hydrology theme evaluates the contribution of Commonwealth environmental water to flow regimes and hydrological connectivity across the Basin, which also underpins the evaluation of ecological outcomes for other ecological indicators evaluated at the Basin scale (Fish, Vegetation, Ecosystem Diversity, Stream Metabolism and Water Quality, and Biodiversity).</p> <p>Data sources for evaluation contribution to flow regimes and hydrology connectivity are outlined below in 'Data input'.</p> <p>Please refer to the <i>Murray-Darling Basin LTIM Project: 2018-19 Basin-scale evaluation of Commonwealth environmental water – Hydrology</i> Report for the detailed method on data used for evaluation.</p>
Type	<p>Dataset (excel)</p> <p>Shapefile (.shp)</p>
Data inputs	<p>Data used that contributed to the evaluation of Hydrology include:</p> <p><u>Recorded streamflow data</u> at the below jurisdictional websites: New South Wales: http://waterinfo.nsw.gov.au</p>
