Company Dataset – Help File

Getting Started

1. Purpose

ASIC successfully made its Company register extract available to the public via data.gov.au on the 3 September 2014. This document is to provide detailed context and understanding of the files uploaded to Data.gov.au by ASIC every Tuesday.

2. Company Register

Select data from the ASIC's Company Register will be uploaded every Tuesday to www.data.gov.au. The data made available will be a snapshot of the register at a point in time. As a result, the information might not be accurate at the time you check this dataset. [ASIC Connect](#) updates information in real time, so please consider accessing information on that platform if you need precise information. Legislation prescribes the type of information ASIC is allowed to disclose to the public.

The company register dataset contains the following:

- Select fields that are publicly available (see data dictionary for field details);
- All currently registered companies that are able to be upload to data.gov.au;
- Deregistered companies for the past year; and
- Historical name data for registered companies.

2.1. File Format

The company dataset is provided in a file with the extension of CSV (comma separated values) and ZIP that contains the CSV file inside.

Important note: The data contained within the company register csv is **not** separated by commas

The company register csv uses the 'TAB' character as the delimiter (value separator) between values in the dataset; the 'TAB' character is used in place of a comma separator because company names can contain commas in their name and therefore is not a suitable delimiter for this dataset.

Company Dataset – Help File

An example of the data in the company register csv is as follows

Company Name	ACN	Type	Class	Sub Class	Status	Date of Registration	Date of Deregistration		
Previous State of Registration				State Registration number		Modified since last report	Current Name		
Indicator	ABN	Current Name		Current Name Start Date					
COMPANY XYZ	987654321		APTY	LMSH	PNPC	REGD	08/01/2024		
	Y	44444444444							
COMPANY ABC	012345678		APTY	LMSH	PROP	DRGD	19/04/2022	31/01/2024	VIC
	C1234567W		Y	12345678989					

2.2. File interaction

The company register data set contains over 3 million records. Because of the number of records contained in the file, common programs used to view data from CSV's (MS Excel, notepad, etc.) will not work.

Example: Most versions of MS Excel limits the number of rows to approximately 1 million rows, meaning if that dataset is viewed in Excel, less than half of the actual number of records will be available.

It is recommended users interact with the dataset on data.gov.au via one of the following methods:

Important note: ZIP file extensions cannot be access via an API. XLSX file extensions is no longer supported by CKAN as of December 2021 and any information extracted using this method may not return up to date data. For more information, see the [CKAN website](#).

- Dataset Preview on data.gov.au;
- Access resource data via a web API with powerful query support (API information can be found in the [main CKAN Data API and DataStore documentation](#)); or
- Import csv into an appropriate database (MS Access, Oracle, etc).

A step-by-step data import guide to importing Company data into MS Access can be found in the appendix of this help file. ([APPENDIX ITEM 1](#))

2.3. Dataset Fields

The Company dataset contains the following fields:

- Company Name
- Australian Company Number (ACN)
- Type

ASIC
Australian Securities &
Investments Commission

Company Dataset – Help File

- Class
- Sub Class
- Status
- Date of Registration
- Date of Deregistration
- Previous State of Registration (where applicable)
- State Registration Number (where applicable)
- Modified since last report – flag to indicate if data has been modified since last report
- Current Name Indicator
- Australian Business Number (ABN)
- Current Name
- Current Name Start Date

A comprehensive description of each field in the dataset is provided in the attached data dictionary ([APPENDIX ITEM 2](#)).

3. ASIC Connect Search

An alternative to searching the data contained in the Company Register extract is to use [ASIC Connect](#).

We have two services currently available through ASIC Connect:

- Search company and other registers
- Search business names registers

You can view publicly available information and purchase extracts on entities such as companies, business name, banned & disqualified or check name availability.

4. Contact

Any further enquiries can be directed to ASIC via email at Access.Request@asic.gov.au

APPENDIX ITEM 1

Company Register - MS Access Import Guide

Use the following steps to import csv data into a new MS Access database; similar steps can be used to update an existing database:

Steps are provided using MS Access 2010

1. Download CSV dataset file;
2. Create blank database in MS Access;
3. Select 'Text File' from the Import & Link section of the External Data tab;

4. Browse to the CSV dataset file and choose to import into a new table and select 'Next';

5. Select Delimited format and select 'Next';
