

Declaration of *provisional interim NBN service area*

For the purposes of Part 19 of the *Telecommunications Act 1997* (the Act), the areas listed in Appendix A are the ***provisional interim NBN service areas*** declared for the month of September 2020.

As per section 360E of the Act, NBN Co is the ***statutory infrastructure provider*** for the areas declared.

Explanatory Notes

Data published represents the **nbn™** broadband access network as of 1st October 2020 and aligns to our public rollout map available at <https://www.nbnco.com.au/learn/rollout-map>

nbn™ broadband access network design means that any service area not covered by **nbn™** Fixed Line or **nbn™** Fixed Wireless will be covered by **nbn™** Satellite. **NBN Co** will update and exclude areas that can already access fast broadband services through an existing fibre network. Due to timing differences, there may be areas where **NBN Co** is currently the Statutory Infrastructure Provider but not represented as such on the ACMA website.

Suburbs are based on State Suburbs from **1270.0.55.003 - Australian Statistical Geography Standard (ASGS): Volume 3 - Non ABS Structures, July 2016**.
