Introduction

PSMA's Administrative Boundaries dataset is Australia's most comprehensive national collection of boundaries including government, statistical and electoral boundaries. The dataset contains boundaries in six themes: Australian Bureau of Statistics (ABS) boundaries, electoral boundaries, state and territory boundaries, local government areas, suburbs/localities, and town points. Some of the themes, such as the ABS, include further layers of data to support a wide range of analysis and segmentation activities. For more information, please refer to the Administrative Boundaries Product Description.

Document Purpose

This document provides a description of the issues, changes, features, updates and overarching statistics relating to the applicable data release. This document should be read in conjunction with the relevant Product Description.

Audience

This document is made available to PSMA staff, data contributors, direct clients and end users. It intended to be used by business managers, data managers and analysts as a guide and reference to understanding the content and variations within a data release.
